Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is in response to applicant's amendment filed December 30, 2005. Claims 3, 4, 5, 7, 8, 11, 15, 16, 17, 18, 21, 22, 23, 24, and 25 have been amended. Claims 1-25 are pending in this case.

Response to Arguments

2. Applicant's arguments with respect to claims 1-25 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rickard et al (US 6,016,483) in view of Finebaum et al (US 2002/0156719).

5. Regarding claim 1 –

Rickard discloses a method of determining an opening price for a product traded in a trading system, the method executed over a distributed network computer system, said method comprising: with removing further comprising: identifying the oldest of interest at the most aggressive price on each side of the market; selecting the older interest of the identified interest to designate as initial interest; and matching initial interest against all contra side interest (e.g. col 6 ln 45- col 7 ln 47, col 10, 40-55; col 11 ln 15-25).

Art Unit: 3621

6. Rickard does not specifically discuss detecting a lock/cross condition in the market prior to opening; removing the lock/cross condition to allow opening of trading in the particular product. However, it would be obvious to one of ordinary skill in the art to adapt Rickard to include this, or any number of other steps, in order to more efficiently and profitably trade. Additionally, Finebaum does include the step of removing a lock/cross condition through, for example, better pricing. (e.g. par. 0075. 0090). It would be obvious to one of ordinary skill in the art to combine the teachings of Rickard and Finebaum in order to more efficiently and profitably trade.

7. Regarding claim 2 –

Rickard discloses products that are financial instruments (e.g. col 2 ln 60-67; col 4 ln 1-5).

8. Regarding claim 3 –

Rickard discloses calling an internalizing agent process to match orders against contra side interest of a market participant at the best price and having an ID matched to and ID in the order (e.g. col 1 ln 25-45).

9. Regarding claim 4 –

Rickard discloses interest that is all quote generated and non-directed, priced orders and the initial interest is designated as an incoming order (e.g. col 6 ln 45 – col 7 ln 50, col 10 ln 40-55).

10. Regarding claim 5 –

Rickard discloses executing any remaining interest in a particular priority (e.g. col 6 ln 5-60).

Art Unit: 3621

11. Regarding claim 6 –

Rickard discloses the method wherein the particular priority is Price/Time priority (e.g. col 7 ln 25-40).

12. Regarding claim 7 –

Rickard discloses the method wherein interest exists at multiple price levels on each side of the market and at each price level, and all displayed interest is executed first before moving to another price level (e.g. col 7 ln 35-50).

13. Regarding claim 8 –

Rickard discloses the method wherein interest exists at multiple price levels on each side of the market and at each price level, and all displayed interest is executed first followed by any reserve size before moving to another price level (e.g. col 7 ln 35-50).

14. Regarding claim 9 –

Rickard discloses the method of claim 8 wherein reserve size is executed in the order in which displayed size was executed (e.g. col 7 ln 35-50).

15. Regarding claim 10 –

Rickard discloses the method of claim 1 wherein the sides of the market are a bid side and an offer side (e.g. col 6 ln 45 – col 7 ln 50).

16. Regarding claim 11 –

Rickard discloses the method wherein executions occur at the price of book interest so that any price improvement is realized by the initial interest (e.g. col 6 ln 45 – col 7 ln 50).

17. Regarding claim 12 –

Art Unit: 3621

Rickard discloses the method wherein after an execution occurs, the method further comprises: updating quote-generated orders (e.g. col 6 ln 45 – col 7 ln 50).

18. Regarding claim 13 –

Rickard discloses the method of claim, and as above, does not specifically discuss detecting a lock/cross condition in the market prior to opening; removing the lock/cross condition to allow opening of trading in the particular product. However, it would be obvious to one of ordinary skill in the art to adapt Rickard to include this, or any number of other steps, in order to more efficiently and profitably trade.

19. Regarding claims 14-25 –

Claims 14-25 are written as a computer program and as a system and contain the same limitations as claims 1-13 above. The same rejections, therefore, apply.

20. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

21. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3621

22. Madoff et al (US 2002/0019795) discloses an opening price process for trading system.

23. Moore et al (US 2003/0229563) discloses an opening price process for trading system.
